"In a world of so few great male vocals, Manchildblack is already bangin' and a talent to keep your eye on!"  
- Danny Krivit, 718 Sessions / Body-n-Soul NYC

Manchildblack is this generation's true Renaissance man. His music and mission are both clear and powerful and is now resonating with audiences around the world. "This is about more than me, it's about a movement and I plan to be one of the leaders in the forefront of the change that's coming".

A proponent of what he calls "Raw Soul"- an amalgamation of Funk/Rock/Hip-Hop and R&B/Soul, Manchildblack brings to the music world uplifting and socially conscious lyrics, a bohemian sense of style, and a warm and inviting spirit that illuminates every stage he graces. Like his idols, Stevie, Donny, Marvin and Gil, Manchildblack is on a mission to heal, educate and elevate audiences through inspirational songs of life, love and self-discover.
